

The Q-Card App

The Q-Card App, working alongside the Approval App, transforms how businesses handle expenses. It provides virtual cards linked to corporate accounts, making it easier to request, approve, and manage expenses. Employees can request funds, which then follow a customizable approval process. When approved, these requests create Q-Cards which are secure Mastercards with temporary details. With strong security measures, it simplifies online purchases and offers real-time balance tracking, mobile convenience, and thorough reporting, ensuring efficient, secure, and stress-free expense management.

The Q-Card App

Purpose

Our solution streamlines the management of low-value suppliers and maverick spending, reducing costs and freeing up your procurement team for value-added tasks. With Q-Card, you gain a secure, user-friendly B2B procurement experience, tailored to your company policies. Flexible pre-approval rules empower budget holders, while global payment platforms ensure control. Q-Card simplifies your procurement process and embraces efficiency, making tail spend management effortless.

Benefits

Reduce expenses associated with managing low-value vendors and maverick spending.

Robust security measures like 3D Secure and Know-Your-Customer protect against fraud.

Simplify expense approval with customizable matrices and workflows.

Access and manage expenses on-the-go via mobile devices.

Keep an eye on account balances to prevent errors.

Generate detailed expense reports for better financial insights.
